

mediaJET® Museum Watercolor | Natural white fine-art watercolour paper

Product description

The Museum Watercolor is a natural white, absolutely striking fine-art cotton paper with a regularly structured, classic watercolour surface. Despite its expressive structure, the paper is soft to the touch. Due to the specially matched coating without optical brightener, free of lignin and acid, long-lasting art reproductions with extremely high colour gamut and black densities can be ideally printed.

Specific feature

This fine-art paper mediaJET Museum Watercolor is characterized by a unobtrusive, yet full of watercolor character present paper surface and is made of 100% cotton. Due to its watercolour texture, mediaJET Museum Watercolor is ideal for valuable editions and original prints. Due to the special ink jet coating without OBA's with its unique texture, a large colour gamut, high contrast and colour density can be achieved with pigment and dye inks and with most printing systems.

Processing

To guarantee optimal quality, photo and fine art papers should be stored and processed in a climate with 30-70% relative humidity and at temperatures from 15-30°C. We recommend that the paper be acclimatised in the print room for one day before printing, and to reseal in the original package after printing. Prevent fingerprints on the coated side by wearing clean cotton gloves while processing. Please avoid contact with solvent, glue and softener, leads to yellowing.

Technical specification

Material:	Paper	Colour L:	98,75
Application Area:	only indoor	Colour a:	-0,3
Surface:	Matt	Colour b:	2,35
Specific gravity:	310,00g/m ²	UV Whiteness:	>79 (D65/10°)
Thickness:	580,00µm	Opacity:	>98%
Water resistant:	yes	PH Value:	neutral
Cold lamination:	yes	Optical brighteners:	none
Heat lamination:	yes	Cellulose:	100% cotton
		DIN ISO 9706 archive-resistant:	yes
